

# Ouroboros V0:

\* Largely modeled after Lt. Col. Thomas Bearden's motionless electromagnetic generator (MEG)

→ Video design brief available on: <https://www.youtube.com/@RedEyesBadDragon>

## Version 0 overview

\* The above diagram is composed of 4 parts:

- Pulse control
- The "Electric field transformer"
- A switching circuit (used for self powering)
- An electronic load (ex: phone charging/appliances)
